Patent Jochmus, Ingrid

Applicant: Jochmus, Ingrid

Applicant: Nieland, John

Patent Of Invention: Papilloma Virus L1-protein and Use Thereof in Diagnosis and

Patent Patent Patention: 50125/036001

Patent Patention Number: US/09/980,177A

CURRENT PILING DATE: 2001-11-29

PRIOR APPLICATION NUMBER: PCT/EP00/05006

PRIOR PATENT APPLICATION NUMBER: PCT/EP00/05006

PRIOR PILING DATE: 2000-05-31

PRIOR APPLICATION NUMBER: DE 19925199.1

PRIOR PILING DATE: 1999-06-01

NUMBER OF SEQ ID NOS: 77

SOPTWARE: PastSEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      片

Sequence 69, Application US/09980177A

Patent No. 6838084

Patent No. 6838084

GENERAL INFORMATION:

APPLICANT: Jochnus, Ingrid

APPLICANT: Nieland, John

TITLE OF INVENTION: Cytotoxic T-Cell Epitopes of the

TITLE OF INVENTION: Papilloma Virus L1-Protein and Use Thereof in Diagnosis and

TITLE OF INVENTION: Therapy

FILE REFERENCE: 50125/036001

CURRENT PELICATION NUMBER: US/09/980,177A

CURRENT PILING DATE: 2001-11-29

PRIOR APPLICATION NUMBER: PCT/EP00/05006

PRIOR PILING DATE: 2000-05-31

PRIOR PILING DATE: 1999-06-01

NUMBER OF SEQ ID NOS: 77

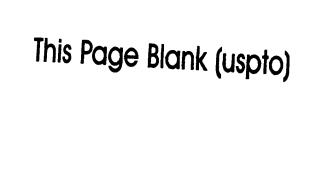

SOFTMARE: PastSEQ for Windows Version 4.0

SEQ ID NO 69

LENGTH: 20

ORGANISM: Human papillomavirus type 16

US-09-980-177A-69
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            LENGTH: 20 amino acids
TYPE: amino acid
STRANDEDNESS: single
TOPOLOGY: linear

                                                                                                                                                                                                                                                                                                                         Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            score:
